

VISHAL YADAV

+91-9695265076 | vishalyy1001@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Summary

Aspiring Data Analyst with hands-on project experience in data cleaning, exploratory data analysis, and dashboard development using Python, SQL, and Power BI. Skilled at turning raw, unstructured datasets into clear, actionable insights, with a growing foundation in statistics and probability.

Education

Galgotias University

B.Tech – Computer Science and Engineering

Greater Noida, Uttar Pradesh

(2022 - 2026)

Bishop Johnson School

Higher Secondary Education (ISC) – PCM

Prayagraj, Uttar Pradesh

Project Experience

Customer Behaviour Analysis & Dashboard | Python, SQL, Power BI [\[View Project\]](#)

(2026)

- Performed end-to-end customer behaviour analysis using Python, Pandas, NumPy, SQL, and Power BI, processing 3.9K+ customer records.
- Cleaned, transformed, and analyzed customer data; used SQL queries to answer business questions and identify trends across revenue, sales, categories, age groups, subscriptions, and shipping types.
- Built an interactive Power BI dashboard with KPI cards, 6+ visualizations, filters, and category/age-group analysis, including \$59.76 average purchase and 3.9K+ customers.

CodeBook – Social Network Data Analysis & Recommendation System | Python [\[View Project\]](#)

(2026)

- Analyzed and cleaned CodeBook social network data using pure Python, handling missing values, inconsistent records, and unstructured user data to prepare datasets for analysis.
- Developed a "People You May Know" recommendation system by evaluating user relationships, mutual friends, and social connections to generate relevant connection suggestions.
- Built a personalized page-recommendation system by processing user interests, liked pages, and network relationships to identify and recommend relevant content.

Iris Flower Classification | Python, Pandas, NumPy, Scikit-learn, Random Forest [\[View Project\]](#)

(2026)

- Built a **Random Forest Classifier** to classify **150 Iris samples** across **3 species** using 4 numerical features: sepal length, sepal width, petal length, and petal width.
- Performed **data preprocessing, feature selection, model training, and prediction** using Pandas and Scikit-learn with separate training and test datasets.
- Developed an end-to-end **supervised machine learning pipeline** for multi-class classification and generated predictions on unseen test data.

Skills & Interests

Languages: Python, SQL, Java

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning

Machine Learning: Scikit-learn, Random Forest, Classification, Supervised Learning, Model Training

Data Visualization: Power BI, Dashboard Development, Data Visualization, KPI Analysis

Database: MySQL

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Conda

Certification

Data Science: Code with Harry

Python: Code with Harry

Database: Oracle Academy
